Title Index to Volume 6

Analysis of 1.4 GH_Z Radiometric Measurements from Skylab (Lerner, Hollinger), 251

Applications of suits spectral model to wheat (Chance), 147

Book Review: N. G. Jerlov, *Marine Optics* (Reviewed by A. J. LaRocca), 151

Comparative study of cloud classification techniques (Parikh), 67

Determination of the optimum field of view and spacing between observations for a satellite–borne scanning radiometer observing the stratosphere (Campbell, May), 157

Effect of the atmosphere on the classification of satellite observations to identify surface features (Fraser, Bahethi, Al-Abbas), 229

Evaluating soil moisture and yield of winter wheat in the Great Plains using Landsat data (Heilman, Kanemasu, Bagley, Rasmussen), 315

Feasibility study in using multiband photography for studies in geomorphology, soils and land use (Murthy, Pandey, Hirekerur, Unni), 139

Idenfitying flood water movement (Currey), 51

Interpretation of airborne spectral reflectance measurements over Georgian Bay (Miller, Jain, O'Neill, McNeil, Thomson), 183

Measurement of vorticity in the surface layer using an acoustic echo sounder array (Gaynor, Hall, Edinger, Ochs), 127

Method of smoothing digital thematic maps (Davis, Peet), 45

Multispectral Analysis of the Interface Between the Brazil and Falkland Currents from Skylab (Johnson, Norris), 271

Ocean waveheight nondirectional spectrum from inversion of the HF sea-echo Doppler spectrum (Barrick), 201

Optimal spatial sampling techniques for ground truth data in microwave remote sensing of soil moisture (Rao, Ulaby), 289

Pattern recognition of Landsat data based upon temporal trend analysis (Engvall, Tubbs, Holmes), 303

Reflectance of leaf components (Gausman), 1

Remote sensing in ecological botany (Vinogradov), 83

Satellite Observations of Snowcover in the Sierra Nevadas During The Great California Drought (Schneider, Matson), 327

Sea truth and environmental characterization studies of Mobile Bay, Alabama (Schroeder), 27

Spectral estimation of grass canopy variables (Tucker), 11

Study of density fronts and their effects on coastal pollutants (Klemas, Polis), 95

Visible and near-infrared reflectance of beach sands: a study on the spectral reflectance/ grain size relationship (Leu), 169
